DETAILED ACTION

Response to Amendment

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in-37-CFR-1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 7th 2004 has been entered.

Applicant's arguments, see Remarks, filed Jun 6th, 2004, with respect to independent claims 1, 19, 37, and 40 have been fully considered and are persuasive. The rejection of claims 1-45 has been withdrawn.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The independent claims 1, 19, 37, and 40 were previously rejected in view of U.S. Patent 5,948,040 to DeLorme et al. DeLorme discloses a geographical special interest guide that categorizes images and other digital data with different geographical locations. DeLorme does not disclose receiving the digital images submitted by a user from an electronic device controlled by the user. In the TRIPS embodiment disclosed

by DeLorme, the user may browse different images and other data associated with geographical locations but it is not taught or fairly suggested that the user may submit images to the TRIPS database.

Many file sharing or submitting applications are known in the art of image processing. An example of such an application is U.S. Patent 6,324,538 to Wesinger Jr. et al. Wesinger discloses requesting and receiving data and images from users and publishing the data and images according to specified categories (column 2, line 60-column 3, line 40). However-Wesinger-does not teach or fairly-suggest-categorizing data according to a geographical special interest guide. Therefore there is no apparent obvious combination or motivation to combine the geographical special interest guide of DeLorme and the capability of allowing user submission of images taught by Wesinger.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

Other prior art considered relevant but not relied upon is as follows:

Art Unit: 2623

U.S. Patent 5,852,810 to Sotiroff et al. is a geographic specific information guide where users can query a map interface to find out about housing etc. in an area of the map. The guide also allows property managers to update the pictures etc. of the areas for display. However the property managers are considered an administrative user and are not interpreted as allowing a user to submit images.

U.S. Patent 6,240,360 to Phelan discloses a system for providing information associated with map categories, but does not allow for users to submit images or data.
